Maintenance Technician-Warm Springs GA

Do you have maintenance experience in a manufacturing or industrial military setting and are looking for your next career move? If so, Georgia-Pacific is hiring a **Maintenance Technician** for our Warm Springs, GA Plywood facility. This is a skilled hourly position requiring a thorough understating of safe work practices and experience troubleshooting and maintaining manufacturing equipment. This position creates value by performing predictive, preventative and corrective maintenance that leads to increased uptime, reliability, and the assurance of meeting production and quality goals.

Georgia-Pacific in Warm Springs, GA manufactures Plytanium® plywood sheathing which is ideal for residential and light commercial construction and Ply Frame® Panels which is softwood & hardwood veneer used for commercial and residential construction, home remodeling, large DIY projects and upholstered furniture framing. Our facility has been in the community and in operations for forty years. GP employees strive for safety and health excellence while achieving an injury free workplace. To learn more about our Building Products division, visit www.buildgp.com.

A Day In The Life Typically Includes

- Perform mechanical inspections, repair and maintenance on all manufacturing equipment
- Work to improve uptime within the plant
- Document and record preventative maintenance findings in the computerized maintenance management system (CMMS)
- Replace and/or repair defective parts using welding, drill press, surface grinder and other maintenance mechanical tools and skills
- Maintain and lubricate machine tools and equipment
- Perform preventive maintenance on equipment as scheduled
- Adhere to and promote all safety policies, procedures and guidelines to ensure a safe work environment throughout the plant

What Do You Need

- High School diploma or GED
- Willing and able to work any shift, variable start times, overtime, weekends, and holidays as scheduled
- A minimum of three (3) years of maintenance/millwright experience in an industrial manufacturing environment
- Experience in arc welding and oxygen/acetylene cutting
- Experience troubleshooting issues with bearings, chains, sprockets, gearboxes, and conveyors
- Experience with computers for record keeping and documentation functions

- Willing and able to work in high places in excess of 80 feet
- Willing and able to work in confined spaces
- Willing and able to follow precision job plans for critical work orders and equipment repairs
- Willing and able to use precision job tools to include but not limited to: torque wrench, belt hog, and laser alignment tools
- Willing and able to maintain a strict adherence to safety rules and regulations to include wearing safety equipment

What Would Put You Ahead

- Five (5) or more years of maintenance/millwright experience in an industrial manufacturing environment
- Experience with a computerized maintenance management system (CMMS)
- Experience with manual lathes and milling machines
- Knowledge of mechanical, hydraulic, pneumatic, power transmission, HVAC and steam systems
- Experience with reliability best practices as it relates to hydraulics, bearings, pumps, motors and mechanics
